

The White House, Wellsborough

Key Facts:

Client: Mercer Building Solutions

Completed: April 2017

Contract Value: £1.5 million

The White House scheme was for the redevelopment of an existing single dwelling and the aim was to create a top-quality, aesthetically pleasing country home. It is set in remodeled landscaped grounds, perfect for a house of this quality within such a fine open country setting.

The White House at Wellsborough Market Bosworth was a former Farm House which had been added to over a number of years, but stood neglected within a beautiful setting. The additions had created an ugly, poorly balanced and a badly planned house which had become visually intrusive within the countryside.

The proposal was to create a remodeled dwelling which would provide an excellent home befitting its prominent open countryside setting to the west of Market Bosworth.

The project consisted of the full remodeling and complete refurbishment together with extensive extensions, adding a new triple garage block with accommodation over, and an indoor swimming pool complex. The home has five bedrooms, all with luxury ensuite's. The kitchen is handmade from hardwood and was hand painted on site. There is a quirky air-conditioned wine room with a capacity of storing 800 bottles at the required temperature.

The high quality internal fittings and finishes were accomplished using many hardwoods including oak mahogany and tulip fashioned by skilled craftsman.

Externally the grounds underwent a full Architectural landscape design utilizing natural materials such as slate paving, oak sleepers together with brick retaining walls with slate copings making excellent use of the setting.

The landscape design also incorporated a complex planting scheme of mature hedges and borders.
